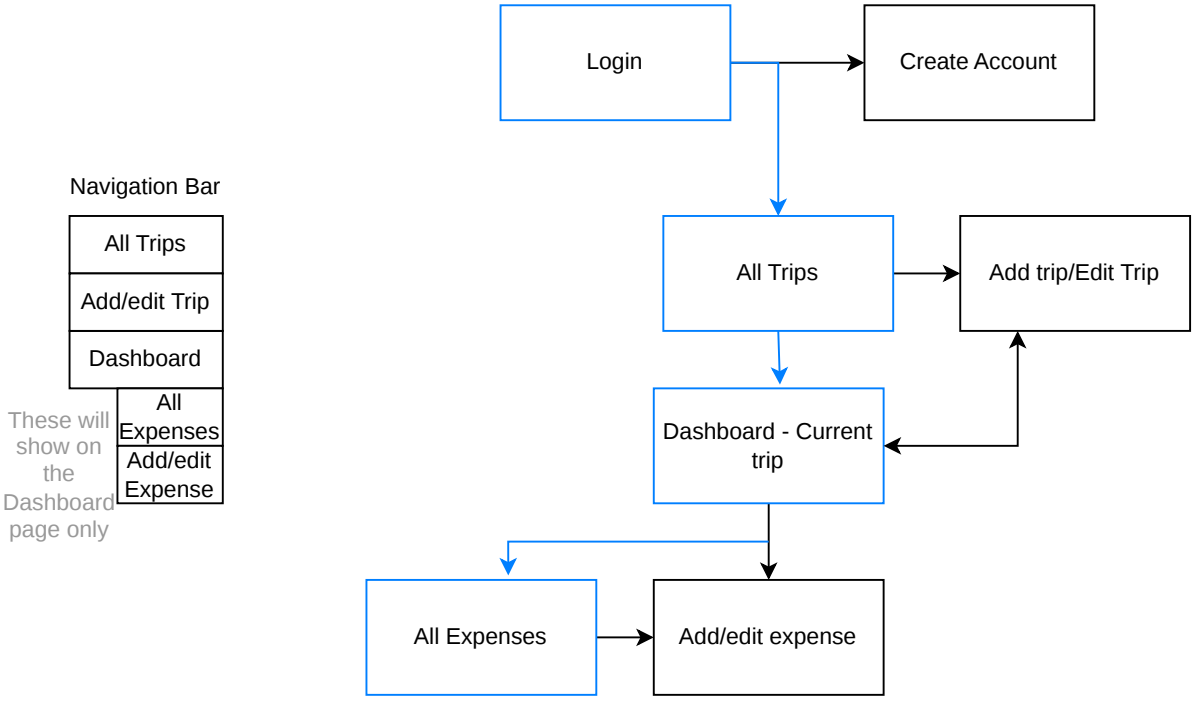
Storyboard

User: Shauna

Goal: Stay organized, track all expenses, see cost breakdown by category, see which category she is spending the most money



When the user logins they will automatically see all trips. Once they click on a trip they are taken to that trips dashboard. The dashboard shows their budget progress and pie chart with categories.

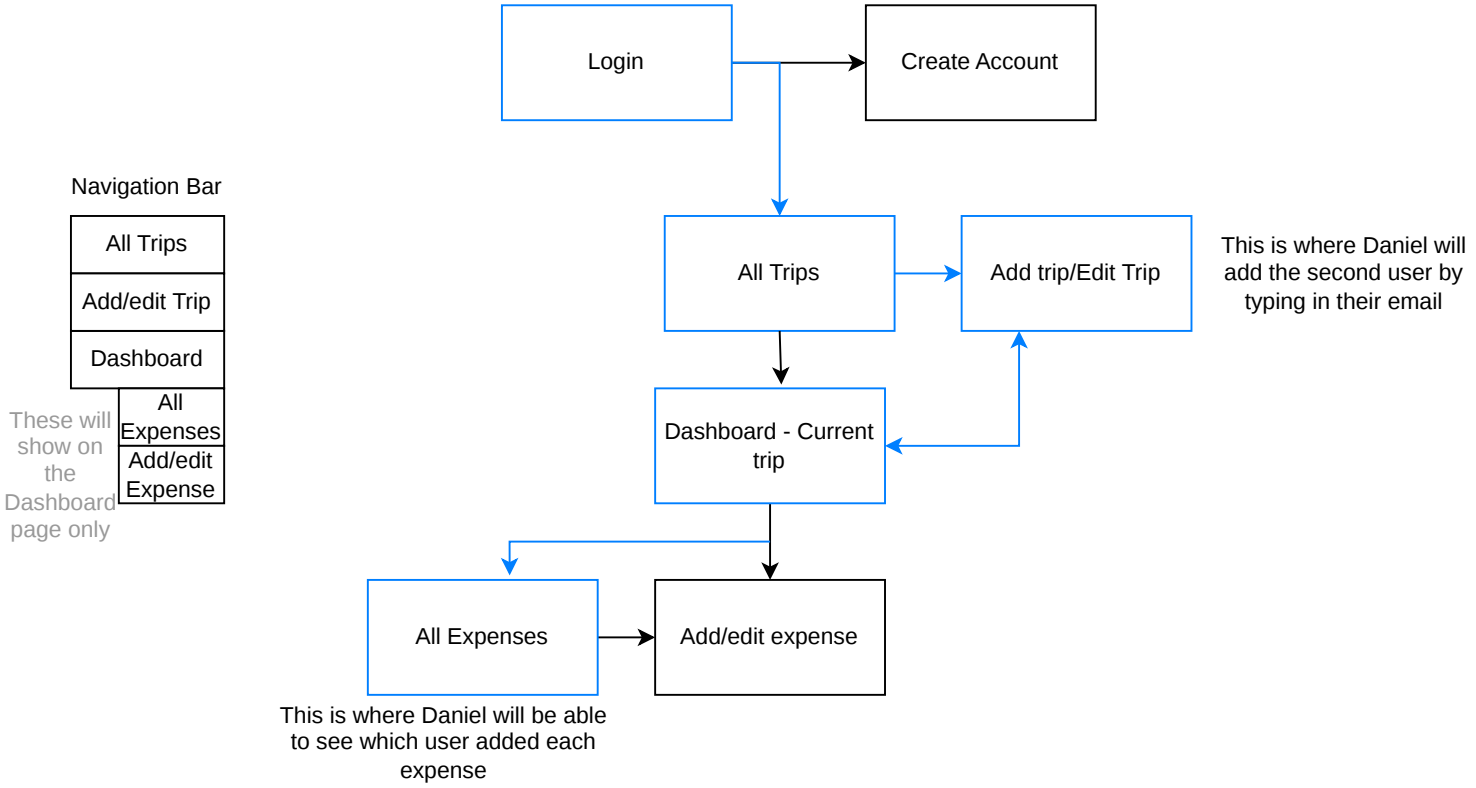
On the Dashboard page they can see 'Add Expense' and 'View Expenses'

Shauna will start out on the login page, then go to her 'all trips' page. She will click on a trip and be taken to the trip dashboard where she can immediately see her current trip and budget with categorical breakdown. She can then view all her logged expenses by clicking on the button to view expenses or she can easily add a new expense by clicking 'Add expense'

Stretch Feature Storyboard

User: Daniel

Goal: Track all expenses, add a second user to the trip, see which user added each expense



Daniel will start out by logging in to his account and he is then taken to his All trips page. He will add a new trip and will enter the other user's email on the shared user section of the Add/Edit trip page. Then he will be taken to the trip dashboard. He can add go to the All Expenses page and see which user is responsible for adding each expense.
