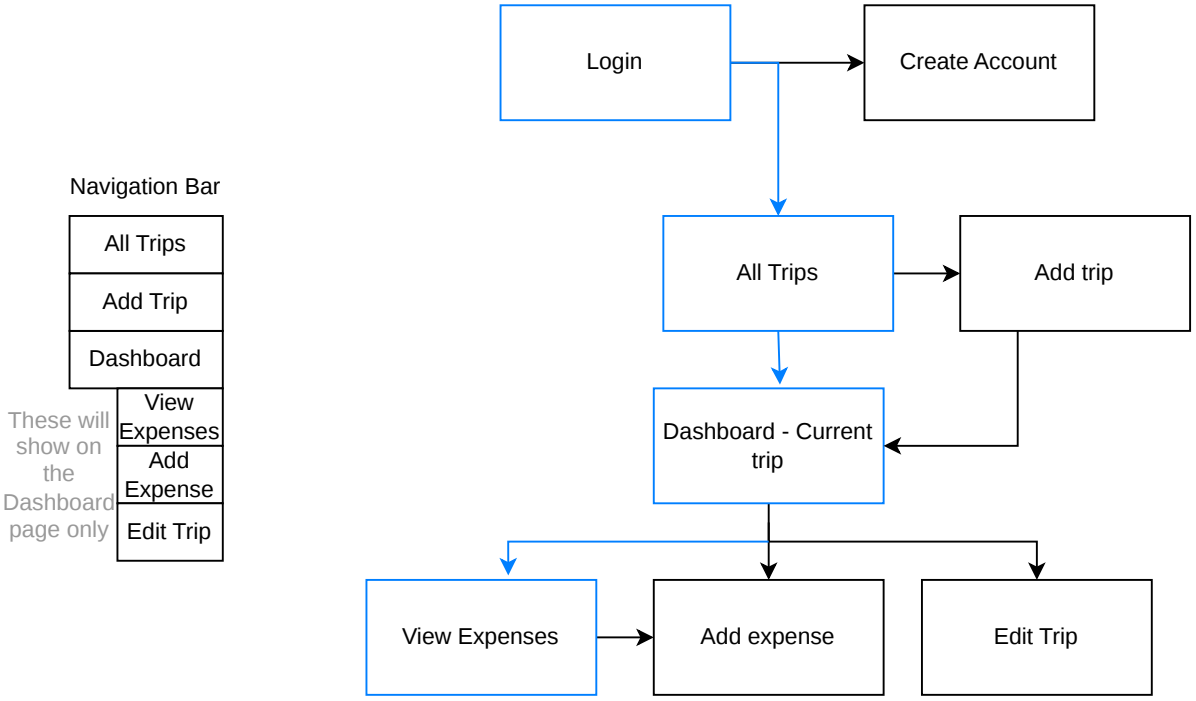
Storyboard

User: Shauna

Goal: Stay organized, track all expenses, see cost breakdown by category, see which category she is spending the most money



When the user logins they will automatically see all trips. Once they click on a trip they are taken to that trips dashboard. The dashboard shows their budget progress and pie chart with categories.

The user can click the hamburger nav bar to view 'All Trips' and 'Add Trip'

On the Dashboard page they can see 'Add Expense', 'View Expenses', and 'Edit Trip'

Shauna will start out on the login page, then go to her 'all trips' page. She will click on a trip and be taken to the trip dashboard where she can immediately see her current trip and budget with categorical breakdown. She can then view all her logged expenses by clicking on the button to view expenses or she can easily add a new expense by clicking 'Add expense'
